

Press Release

Solex Energy Ltd is the 2nd most trustworthy Solar EPC Company

Date: 22 March 2021

As per the a survey conducted by USAID, GERMI and CII in the month of October-November-2020 spread over a period of two months, Solex Energy Ltd has come out in flying colour and stood 2nd in the Solar EPC works in its PV installations across Gujarat securing 69.9 marks out of 100.

Gujarat Energy Research & Management Institute (GERMI) did this survey under the aegis of United State agency for International Development (USAID) PACE-D 2.0 (Partnership to Advance Clean Energy Deployment) RE Program along with Confederation of India Industry (CII). The survey was conducted under the “Vendor Rating Framework” where more than 23 Solar EPC companies from all over the country were evaluated – 10 companies were from Gujarat. This Rating Framework would ultimately become the benchmark tool for the quality & safety of solar rooftop PV installations by solar vendors across India.

Solex Energy Ltd came out in flying colours in following points:

- High score on usage of quality components
- High performing plant designs
- Only company to provide Staad Pro certificate
- High quality installation procedure
- Full marks in safety measures
- Complete documentation including plant manual.

Solex Energy Ltd is a public listed company, started working in the renewable energy field in 1995. The company is manufacturing SOLEX brand PV modules and is an established EPC player in the solar industry.
