

6. The lowest quote after end of Reverse Auction shall be considered for further processing.
7. For the purpose of extending MSME or any other preference /benefit as per guidelines, the latest quote of respective MSME bidder(s) during the tender-cum-auction process shall be considered.
8. IOCL reserves the right to conduct price negotiation with overall L1 bidder based on price quoted in BoQ and RA.
9. In case of Tender cum Reverse Auction, this file will consist of only over all L1 value for itemrate & percentage BOQ and only itemwise L1 value for itemwise BOQ. In addition to this, system shall generate overall BOQ Comparative Chart after completion of RA. This chart shall consist of prices quoted in price bid (BOQ) as well as in RA by qualified bidders of RA along with their name and comparative ranking.

10. Definitions:

Various terms used in e-Tendering Portal relevant to RA are defined below:

11.1 Starting Price:

As the name describes, Reverse Auction starts from this value. By default, Starting Price will be L1 price emerged from the rates quoted by the bidders in BOQ. This may be reduced, if required.

11.2 Reserve Price:

Reserve Price shall be zero (0) against this field. It will be displayed as NA in further screens.

11.3 Current Price:

Current Price available against any line item (lot) under "Live Auction" tab shows the latest L1 value received against that lot.

11.4 Decremental Value/ Decremental Price / Decrement Price:

This value shall be specified by Tender creator while maintaining auction basic details.

It is the minimum value (in Rs.) which shall be decremented by any competing bidder from "Current Price" while entering his quote. The bidder can decrement only in multiples of this value.

11.5 My Auction Price:

Bidder enters and submits their quote in the space provided against "My Auction Price".

E.g. If Current Price at a moment is X and Decremental value = Y. Then Bidder shall be able to enter My Auction Price = Z where $Z = X - n * Y$ and n is an integer greater than zero (0).

11.6 Elapse Time in Minutes and Auto Extension Time in Minutes:

These values (in minutes) will be specified by Tender creator while maintaining basic details.

Elapse Time is the quantum of period before Auction End Time.

Auto Extension Time is the quantum of period by which the auction End Time will get extended in case of any quote received during Elapse Time.

E.g. Let Auction period is from 11:00 Hrs. to 13:00 Hrs., Elapse Time is 5 Minutes and Auto Extension Time is 10 Minutes.

If any quote is received between 12:55:01 and 12:59:59, Auction End Time will be extended up to 13:10 Hrs. otherwise the auction will end at preschedule time i.e. 13:00 Hrs.

11.7 Maximum Seal Percentage:

Maximum Seal percentage restricts the bidder from quoting abnormally low price in one go by mistake. This value is to be specified by tender creator while maintaining auction basic details.

If Maximum Seal Percentage defined in an auction = p , Decremental Value = Y and Current Price at any time = X . Then bidder cannot quote a price less than $\{[(100-p) \% \text{ of } X] - Y\}$. If a bidder quotes a price less than this, system will not accept it.

E.g. Maximum Seal Percentage = 25%

Decremental Value = 500

Current Price = 10000

The Bidder can't Quote below 7000 i.e. $\{[(100-25) \% \text{ of } 10000] - 500\}$.

11.8 Auction Start Date:

Auction gets available under "Live Auction" tab and open for bidders to quote from this time onwards.

This time shall be at least 48 hours after publishing of Auction details. In case of multi lot auction, this will be the earliest auction start time of each of the line items (lots).

11.9 Auction End Date:

Auction window available to the bidder expires and auction shall not be available under "Live Auction" tab from this time onwards subject to auto extension of the auction. In case of multi lot auction, this time will be auction end time of the line item(lot) whose auction is going to end at the last.

1.16 Purchase Preference linked with Local Content :

Purchase preference linked with local content (PP-LC): Only Class-I Local Supplier are eligible to participate in this tender. Offer of other bidders than Class-I local supplier shall not be considered for evaluation.

Policy issued by the Government of India is attached with this NIT.

1.17 Restrictions on public procurement from countries which share a land border with India under rule 144 (XI) of GFRS, 2017 :

The detailed guidelines regarding the restrictions public procurement from countries which share a land border with India are attached separately with this tender document.

**FORMAT OF BID SECURITY DECLARATION FROM BIDDERS IN LIEU OF EMD
(On Bidders letter Head)**

I/ We, the authorized signatory of M/s.....
participating in the subject Tender No..... , for the job of
....., do hereby declare :

- i. that I / we have availed the benefit of waiver of EMD while submitting our offer against the subject Tender and No EMD being deposited for the said Tender.
