**Sub: Including solar thermal manufacturing as a sector in Production Linked Incentive Scheme**

Dear Sir,

It is heartening to note that government of India is encouraging indigenous manufacturing by launching the Production Linked Incentive scheme. The list includes high efficiency solar Photovoltaic modules.

Since India's solar thermal market is one of the largest in the world with 1.25 million m<sup>2</sup> annually and some of the components continue to be imported particularly vacuum tubes, we request MNRE to also include solar thermal manufacturing. This will further result into several jobs being created and fulfill the vision of 'Atmanirbhar' of our Hon'ble Prime Minister Shri Narendra Modi.

If any details are required related to this sector we will do our best to provide with the necessary information.

With regards,  
for Solar Thermal Federation of India,  
Sd/-  
(Jaideep N. Malaviya)  
Secretary General
