But after the enactment of Electricity Act 2003, MSEB was restructured into 4 Companies viz. MSEB Holding Co. Ltd., Maharashtra State Electricity Distribution Co. Ltd. (Mahavitaran / MSEDCL), Maharashtra State Power Generation Co. Ltd. (Mahagenco/MSPGCL) and Maharashtra State Electricity Transmission Co. Ltd. (Mahatransco/MSETCL) on 6th June 2005. Mahavitaran distributes electricity to consumers across the State except some parts of Mumbai.
- 1.1.2 The Government of Maharashtra vide GR dated 17.03.2018 appointed MSEDCL as a implementing agency for 'Mukhyamantri Saur Krishi Vahini Yojna(MSKVY)' for giving day time power to Agricultural consumers.
- 1.1.3 MSEDCL intends to undertake development of 865 MW (AC) Solar PV ground mounted power plants in Maharashtra to be implemented in various District of Maharashtra. MSEDCL has decided to carry out a Competitive Bidding Process (conducted through electronically facilitated online web based portal i.e. MSEDCL Electronic Tender) (followed by e-reverse auction). MSEDCL shall enter into Power Purchase Agreement (PPA) with the Bidders selected based on this RfS for purchase of solar power for a period of 25 years from the Commercial Operation Date of the solar power projects based on the terms, conditions and provisions of the RfS.

The bidders will be free to avail fiscal incentives like Accelerated Depreciation, Tax Holidays, benefits from trading of carbon credits, etc. as available for such projects, if applicable. The same will not have any bearing on comparison of bids for selection. As equal opportunity is being provided to all bidders at the time of tendering itself, it is up to the bidders to avail various tax and other benefits. No claim shall arise on MSEDCL for any liability if bidders are not able to avail fiscal incentives and this will not have any bearing on the applicable tariff.

After this step, if the quoted capacity by the bidders is more than the spare capacity of the substation then shortlisted bidders shall be invited for the E-reverse Auction for the substation for which bidder has submitted the bid.
- ii. The bidders including its Parent, Affiliate or Ultimate Parent or any Group Company will have to submit bid (single application) quoting a tariff per kWh for all the projects it intends to bid for. Tariff can be quoted up to two places of decimal only. If it is quoted with more than two digits after decimal, it shall be ignored after first two decimal places. B5	RS. 2.70 (TARIFF IN RS./ KWH)	L2
B1	RS. 2.80 (TARIFF IN RS./ KWH)	L3
B4	RS. 2.80 (TARIFF IN RS./ KWH)	L3
B2	RS. 3.00 (TARIFF IN RS./ KWH)	L4
B3	RS. 3.30 (TARIFF IN RS./ KWH)	L5
B7	RS. 3.50 (TARIFF IN RS./ KWH)	L6
B6	RS. 3.60 (TARIFF IN RS./ KWH)	L7
B10	RS. 3.90 (TARIFF IN RS./ KWH)	L8
B9	RS. 4.00 (TARIFF IN RS./ KWH)	L9
B11	RS. 4.00 (TARIFF IN RS./ KWH)	L9

C. Reverse Auction (Step-3):

1. The e-reverse auction shall be conducted on <https://etender.mahadiscom.in> (etendering portal of mahadiscom) for the each substation separately. The ereverse auction for tentatively for 2 to 3 substations may be conducted on a day with some time intervals. MSEDCL shall inform the schedule for the e-reverse auction to the eligible bidders for each substation. E-reverse Auction shall be carried out as specified in “Bid Information Sheet” of this RfS/EoI.
2. Shortlisted bidders for E-reverse Auction will be able to login into <https://etender.mahadiscom.in> (e-tendering portal of mahadiscom) of e-reverse auction, 15 minutes before the start time of e-reverse auction.
 - a) During the 15 minutes prior to start of e-reverse auction process, the respective tariff along with the total project capacity of the bidder shall be displayed on its window.
 - b) The minimum decrement value for tariff shall be ₹ 0.01 per kWh. The bidder can mention its revised tariff which has to be at least 01 (one) paisa less than its current tariff.
 - c) Bidders can only quote any value lower than their previous quoted tariff taking into consideration of the minimum decrement value mentioned in 4.2(C) (2b). However, at any stage, increase in tariff will not be permissible. Bidders can improve their ranking by quoting the tariff lower than their last quoted tariff.
 - d) In the bidder’s bidding window, the following information can be viewed by the bidder: Its tariff as their initial start price and there after last quoted tariff along with project capacity for which the bidder is qualified;
 - e) The initial auction period will be of 60 minutes (one hour) with a provision of auto extension by Eight minutes from the scheduled/extended closing time if any fresh bid is received in last Eight minutes of auction period or extended auction period. If no valid bid is received during last Eight minutes of auction period or extended auction period, then the e-reverse auction process will get closed.

4.3 Selection of Successful Bidders:

1. The bidders shall be selected in the ascending order with lowest quoted tariff (being L1) for the particular substation, till the capacity is exhausted.
2. The lowest quoting bidder will be allotted its qualified project capacity and then, next higher bidder will be allotted its qualified project capacity and so on, till the total capacity is exhausted.
3. The allocation of cumulative project capacity shall be closed at 865 MW.
4. In case of the last selected bidder, if the balance project capacity is less than the total project capacity mentioned by the bidder, then the balance project capacity shall be awarded to the bidder, till the total capacity is exhausted. However, if the allocated capacity is less than 50% of the offered capacity by the bidder, then the bidder shall have the right to refuse the bid within 2 working days after e-reverse auction event in

writing. In such case, this balance capacity will be offered to next eligible bidder at MSEDCL's discretion.

5. In case of tie, among two or more bidders (i.e. their last quoted tariff being the same) they will be considered in the chronological order of their last bid with preference to that bidder who has quoted his last bid earlier than others.
6. In the above case, if the time of quote also becomes exactly same among the bidders at a tie, then the ranking among these bidders shall be done as follow:
Step – 1: Lowest rank will be given to the bidder who has quoted the lowest in Financial Bid and so on. If there is also a tie among any of these bidders, then the following step (Step 2) will be followed.
Step – 2: Ranking will be done based on draw of lots.
7. Allocation would be done based on the substation capacity.
8. After completion of e-reverse auction, the allocation of MW Capacity would be entirely based on the substation capacity and its technical constraints irrespective of any location.
9. MSEDCL have simultaneously floated three different decentralized solar tenders under MSKVY, KUSUM-A & C scheme. List of Substation published under these tenders have common substations. In case, different bidders has submitted bids under different schemes on same substation more than spare capacity of substation, then allocation of the MW capacity will be done as follows:
 - **The first preference** will be given to lowest quoting bidder from **KUSUM-A** and will be allotted the capacity subject to available capacity of the substation and then if its qualified project capacity is exhausted, next higher bidder from KUSUM A (if same Substation mentioned in the bid) will be allotted the project capacity from its qualified project capacity and so on, till the total capacity of substation is exhausted.
 - **Next (second) preference** will be given to lowest quoting bidder from **KUSUM-C** and will be allotted the capacity subject to available capacity of the substation and then if its qualified project capacity is exhausted, next higher bidder from KUSUM C (if same Substation mentioned in the bid) will be allotted the project capacity from its qualified project capacity and so on, till the total capacity of substation is exhausted.
 - **There after (Third) preference** will be given to lowest quoting bidder from **MSKVY** and will be allotted the capacity subject to available capacity of the substation and then if its qualified project capacity is exhausted, next higher bidder from MSKVY (if same Substation mentioned in the bid) will be allotted the project capacity from its qualified project capacity and so on, till the total capacity of substation is exhausted
 - If the sub-station capacity fully exhausted by the lowest quoting bidder, then choice for other sub-station shall be given to next higher bidder from tenders in same sequence i.e. 1) KUSUM-A, 2) KUSUM-C 3) MSKVY (if same Substation mentioned in the bid of either tenders) by MSEDCL and so on. In response to this the successful bidder shall inform its final choice to MSEDCL within 3 days from the date of completion of reverse auction if any.

- 10.** Above mentioned choices shall be based on the available spare capacity at the respective sub-station. At the end of selection process, Letter of Award (LOA) will be issued to all the Successful Bidders after MERC approval. In case of Consortium being selected as Successful Bidder, the LOA shall be issued to the Lead Member of the Consortium.
- 11.** In all cases, MSEDCL's decision regarding selection of bidder through Reverse Auction or otherwise based on tariff or annulment of tender process shall be final and binding on all participating bidders.

Also, MSEDCL reserve the right to short close the capacity lower than tender capacity at its discretion if prices are abruptly high.

All components of the PV plant shall be in accordance with technical specifications given in relevant IS/IEC Standards. The design and commissioning also shall be as per latest IEC/IS standards. The following are some of the technical measures required to ensure quality of the major components used in grid connected solar power Projects.

1. PV Module Qualification

The PV modules used in the grid connected solar power Projects must qualify to the latest edition of any of the following IEC PV module qualification test or equivalent BIS standards.

Crystalline Silicon Solar Cell Modules IEC 61215

Thin Film Modules IEC 61646

Concentrator PV modules IEC 62108

In addition, PV modules must qualify to IEC 61730 for safety qualification testing @1000 V DC or higher. For the PV modules to be used in a highly corrosive atmosphere throughout their lifetime, they must qualify to IEC 61701.

2. Power Conditioners/ Inverters

The Power Conditioners/Inverters of the SPV power plants must conform to the latest edition of IEC/ equivalent BIS Standards as specified below:

Efficiency Measurements	IEC 61683
Environmental Testing	IEC 60068-2/ IEC 62093

Electrical Safety	IEC 62103/ 62109-1&2
Protection against Islanding of Grid	IEEE1547/IEC 62116/ UL1741 or equivalent EN/BIS Standards
LVRT Compliance	As per the latest CERC Guidelines/ Order/ Regulations
Grid Connectivity	Relevant CERC Regulations (including LVRT compliance) and Grid Code as amended and revised from time to time.

Rated capacity	Nominal/Rated output power of the inverter (if different power ratings are mentioned at different temperatures, then power rating at 50 ⁰ C shall be considered) in kW will be considered as inverter rated
-----------------------	--

3. Cables and connectors:

All cables and connectors for used for installation of solar field must be of solar grade which can withstand harsh environment conditions for 25 years from the COD of the project and voltages as per latest IEC standards. (**Note:** IEC Standard for DC cables for PV systems is under development. It is recommended that in the interim, the Cables of 600 - 1800 Volts DC for outdoor installations should comply with the BS EN50618:2014/2pfg 1169/08.2007 or equivalent IS for service life expectancy of 25 years).

4. Other Sub-systems/Components

Each PV module used in any solar power Project must use a RF identification tag. The following information must be mentioned in the RFID used on each module (This can be inside or outside the laminate, but must be able to withstand harsh environmental conditions):

- i) Name of the manufacturer of PV Module
- ii) Name of the Manufacturer of Solar cells
- iii) Month and year of the manufacture (separately for solar cells and module)
- iv) Country of origin (separately for solar cells and module)
- v) I-V curve for the module at Standard Test Condition (1000 W/m^2 , AM 1.5, 25°C)
- vi) Wattage, I_m , V_m and FF for the module
- vii) Unique Serial No. and Model No. of the module
- viii) Date and year of obtaining IEC PV module qualification certificate
- ix) Name of the test lab issuing IEC certificate
- x) Other relevant information on traceability of solar cells and module as per ISO 9000

Site owners would be required to maintain accessibility to the list of Module IDs along with the above parametric data for each module.

8. Safe Disposal of Solar PV Modules:

The Bidder will ensure that all Solar PV modules from their plant after their ‘end of life’ (when they become defective/ non-operational/ non-repairable) are disposed in accordance with the “e-waste (Management and Handling) Rules, 2011” notified by the Government and as revised and amended from time to time.
