○ Manufacturing Base Introduction

Solis new global smart manufacturing base started in 2020 with the annual capacity of 20GW+.

Equipped with fully automated and real-time collection production lines for logistics, production and testing. This includes 8 SMT lines, 8 DIP special-shaped plug-in lines, 12 triple anti-coating lines, 10 automatic assembly lines, 5 aging inspection and packaging integrated production lines. The implementation of intelligent material transport system, AGV, automatic manipulator palletizing system, three-dimensional warehouse and other logistics engineering construction, enables automatic material in and out of storage, production line pulling material distribution and visual management.

Manufacturing Reliability
