PRESS RELEASE

Inox Wind bags order of 200 MW from NTPC Renewable Energy Limited

- **Bags 200 MW turnkey wind power project order**
- **Project to be executed at Dayapar site, Kutch District in Gujarat**
- **Project Scheduled Commercial Operation Date (SCOD) is by January 2024**
- **Repeat order from NTPC post 150 MW order received in 2021 and the largest PSU order in recent times**

Noida, August 3, 2022: Inox Wind, India's leading wind energy solutions provider has bagged an order for a 200 MW wind power project from NTPC Renewable Energy Limited, a wholly owned subsidiary of NTPC Limited, to be commissioned in the state of Gujarat. This amongst many more in the future will help NTPC achieve its target of having over 60 GW Renewable Energy capacity constituting nearly 50% of its overall power generation capacity by 2032. The Project will be executed on a turnkey basis at Dayapar site, Kutch District in the state of Gujarat and is scheduled to be commissioned by January 2024.

Commenting on the occasion Mr. Kailash Tarachandani, CEO of Inox Wind, said 'We are excited to bag this prestigious 200 MW project from NTPC; the largest order awarded by a PSU in the recent past. This is the second project awarded by NTPC to INOX Wind in the recent past, post a 150 MW order received last year. This reflects their immense faith in our capabilities and credentials. A few years ago, INOX Wind had also successfully executed a 50 MW turnkey wind project for NTPC in Gujarat. We hope to foster a long- term relationship with NTPC and become their trusted supplier and an enabler in achieving their ambitious renewable energy target.'

As part of the order, Inox Wind will supply and install DF 113/92 - 2.0 MW capacity Wind Turbine Generators with 113 meters rotor diameter and 92 meters hub height. The common infrastructure facilities such as the 220 KV Pooling Substation at Dayapar and Extra High Voltage Transmission line has already been commissioned and thus the Project will be executed on a plug and play basis with a shorter gestation period. Further, as part of the order, Inox Wind will provide comprehensive operation and maintenance (O & M) for the project. This will add to its multi gigawatt O & M fleet and help grow the overall profitability. 'With the current portfolio and this latest award the O&M business is looking very robust and all geared to embark on a strong growth trajectory' said Mr. Tarachandani.

India has announced a renewable energy target of 175 GW by 2022 and a target of 450 GW by 2030. Given multiple opportunities in the industry along with various government initiatives such as 'Atma Nirbhar Bharat Abhiyan' and the inauguration of the world's largest Hybrid Renewable Energy Park of 30GW at Khavda Village in the district of Kutch in Gujarat, Inox Wind is well positioned to thrive in the future and aims to play a pivotal role in achieving India's ambitious renewable energy target. Inox Wind provides integrated solutions for the entire wind power value chain. The Company which enjoys one of the largest order books in the industry has further strengthened its order book with this latest repeat order.
