

On the road to net zero

Birla Carbon Sustainability Report 2022

Our progress on sustainability in FY2022

At Birla Carbon, we have been sharing our expert knowledge of carbon black and its applications for over a century. As our company has evolved, we have also been pushing sustainability forward for the environment, for our customers and suppliers and for our people and communities. We are proud to share our tenth sustainability report this year.

About our tenth report

Our tenth report includes performance highlights from April 2021 to March 2022 (FY2022) covering the full scope of our global operations. It contains a detailed analysis of performance against our Sustainable Operational Excellence (SOE) strategy and goals over the past year and highlights specific targets for the future.

Since FY2013, through our annual sustainability report, we have documented our journey to promote transparency while continuing to learn through ongoing monitoring and evaluation of our approach. We welcome suggestions and feedback from our stakeholders – including customers, employees and suppliers – as we work to fully embed sustainability-led thinking throughout our global business.

This report is approved by Birla Carbon's Senior Management Team and has been produced in accordance with the GRI 2016 Standards at Comprehensive level.
