

42. Full annual transmission charges shall be recoverable at the target availability stipulated in Regulation 36 of these Regulations. Payment of transmission charges below the target availability shall be on pro rata basis;
43. Incentive:
- (a) The transmission licensee shall be entitled to incentive on achieving annual availability beyond the target availability as per Regulation 36, in accordance with the following formula;
- $$\text{Incentive} = \text{Annual Transmission Charges} \times [\text{Annual availability achieved} - \text{Target Availability}] / \text{Target Availability};$$
- Provided that no incentive shall be payable above the availability of 99.75%;
- (b) 50% of the Incentive shall be shared by the long-term customers in the ratio of their average allotted transmission capacity for the year;
44. Rebate:
- For payment of bills of transmission charges through letter of credit on presentation, a rebate of 2% shall be allowed. Where payments are made subsequently through opening of letter of credit or otherwise, but within a period of one month of presentation of bills by the Transmission Licensee, a rebate of 1% shall be allowed;
45. Late payment surcharge:
- In case the payment of bills of transmission charges by the beneficiary (s) is delayed beyond a period of 1 month from the date of billing a late payment surcharge at the rate of 1.25% per month shall be levied by the Transmission Licensee;

PART-VII SLDC CHARGES

46. The Commission shall determine the charges payable to SLDC, considering the ARR components similar to the transmission licensee, to the extent applicable, with regard to the transmission capacity of the respective distribution licensees and open access customers;

Provided that where the administration of SLDC is with State Transmission Utility, the Transmission utility shall maintain separate accounts for the SLDC and file the same before the Commission along with their petition for determination of ARR for each year of the Control Period;

PART-VIII DISTRIBUTION AND RETAIL SUPPLY BUSINESS

47. **Applicability:**

- 47.1 The Regulations contained in this Part shall apply to the determination of Wheeling Charges payable for usage of distribution wires by a Distribution System User and tariff for Retail Supply of electricity by a Distribution Licensee;

48. **Segregation of Distribution Business and Retail Supply Business:**

The Distribution Licensee shall maintain separate books of accounts for Wheeling Business and Retail Supply Business;

The tariff for Wheeling Business and Retail Supply Business of a Distribution Licensee shall be determined by the Commission on the basis of segregated accounts of Wheeling Business and Retail Supply Business;

Provided that in case complete accounting segregation has not been done between the Wheeling Business and Retail Supply Business of the Distribution Licensee, the Aggregate Revenue Requirement of the Distribution Licensee shall be apportioned between the Wheeling Business and Retail Supply Business in accordance with the following Allocation Matrix;

Particulars	Distribution Business (%)	Retail Supply Business (%)
Power Purchase Expenses	-	100
Inter / Intra Transmission Charges	-	100
O and M Expenses	55	45
Depreciation	85	15
Interest on CAPEX	90	10
Interest on Working Capital	15	85
Interest on Consumer Security Deposits	-	100
Bad and Doubtful dues	-	100
Income Tax	90	10
Return on Equity	75	25
Other Income	20	80

Note: In case the licensees have different matrix, they may furnish the same in tariff application duly supported by necessary studies.

- 48.1 The Wheeling Charges and Retail Supply Tariff of the Distribution Licensee shall provide for the recovery of the Aggregate Revenue Requirement of the Distribution Wires Business and the Retail Supply Business for the respective Years of the Control Period, as approved by the Commission and comprising the following components;

Distribution Wires Business	Retail Supply of Electricity
(a) Capital Investment Plant;	(a) Power Purchase Cost;
(b) Operation and Maintenance expenses with break-up into:	(b) Transmission and SLDC Charges;
i. Employee Cost;	(c) Capital Investment Plant;
ii. Repairs and Maintenance Expenses;	(d) Operation and Maintenance expenses with break-up into:
iii. General and Administration Expenses	i. Employee Cost;
(c) Depreciation;	ii. Repairs and Maintenance Expenses;
(d) Interest on Capital Loan;	

(e) Interest on Working Capital;	iii. General and Administration Expenses
(f) Return on Equity;	(e) Depreciation;
(g) Income Tax;	(f) Interest on Capital Loan;
minus	(g) Interest on Working Capital;
(h) Income from Open Access charges;	(h) Return on Equity;
(i) Non-Tariff income;	(i) Income Tax;
(j) Income from Other Business, to the extent specified in these Regulations:	minus
	(j) Income from Open Access charges;
	(k) Non-Tariff income;
	(l) Income from Other Business, to the extent specified in these Regulations:

Provided that Depreciation, Interest on CAPEX Loan, Interest on working capital and deposits from consumers and Distribution System Users, Debt-Equity ratio, Return on Equity, and Income Tax for Transmission Licensees shall be allowed in accordance with the provisions specified in Part V of these Regulations;

Provided also that prior period income/expenses and other debts shall be allowed by the Commission at the time of Annual Performance Review (truing) up based on audited accounts, on a case to case basis;

Provided that all penalties and compensation payable by the Licensee to any party for failure to meet any Standards of Performance or for damages, as a consequence of the orders of the Commission, Courts, etc., shall not be allowed to be recovered through the Aggregate Revenue Requirement;

Provided also that the Distribution Licensee shall maintain separate details of such penalties and compensation paid or payable by the Licensee, if any, and shall submit them to the Commission along with its Petition;

49. **Capital Investment Plan:**

49.1 The Distribution Licensee shall submit a detailed Capital Investment Plan, financing plan and physical targets for each Year of the Control Period for strengthening and augmentation of its distribution network, meeting the

requirement of load growth, reduction in distribution losses, improvement in quality of supply, reliability, metering, reduction in congestion, etc., to the Commission for approval, as part of the Multi-Year Tariff Petition for the entire Control Period.

49.2 The Capital Investment Plan shall be a least cost plan for undertaking investments and shall cover all capital expenditure projects:

49.3 The Capital Investment Plan shall be accompanied by such information, particulars and documents as may be required, including but not limited to the information such as number of distribution sub-stations, transformation capacity in MVA and details of distribution transformers of different capacities, HT:LT ratio as well as length of distribution line showing the need for the proposed investments, alternatives considered, cost-benefit analysis and other aspects that may have a bearing on the consumer tariff;

Provided that the Distribution Licensee shall submit separate details of Capital Investment being undertaken in each Distribution Franchisee area within its Licence area;

49.4 The Commission shall consider the Capital Investment Plan along with the Multi-Year Aggregate Revenue Requirement for the entire Control Period submitted by the Distribution Licensee taking into consideration the prudence of the proposed expenditure and estimated impact on the consumer tariff;

49.5 The Commission shall approve the capex plan of the licensee, for each year of the Control Period, for determination of the ARR / Tariff.

Provided that the maximum capex (to be termed as 'ceiling capex amount' which shall include interest capitalized) that shall be allowed in the ARR for determination of tariff for each financial year shall not exceed the average of capex incurred during the previous three years of the Control Period.

Provided further that, in order to regulate the spill over works, the Commission shall proportionately reduce the proposed / ceiling capex amount to the extent of ratio of amount involved in the spill over works to the 'ceiling capex amount'.

For example:

Control Period	=	FY25 to FY27
Capex proposed by the Licensee	=	Rs.3000 Crores, Rs.3500 Crores, Rs.4000 Crores, respectively for each year of the Control Period.
'ceiling capex amount'	=	Rs.2500 Crores.
Spill over works as at 31.02.2024	=	Rs.500 Crores.
Allowable capex for each year	=	

For the 1st Year of the Control Period

$$\text{Rs.3000 Cr} - \frac{\text{Rs.500 Cr}}{\text{Rs.2500 Cr}} \times \text{Rs.3000 Cr} = \text{Rs.2400 Crores}$$

For the 2nd Year of the Control Period

$$\text{Rs.3500 Cr} - \frac{\text{Rs.500 Cr}}{\text{Rs.2500 Cr}} \times \text{Rs.3500 Cr} = \text{Rs.2800 Cr}$$

subject to ceiling of Rs.2500 Cr

For the 3rd Year of the Control Period

$$\text{Rs.4000 Cr} - \frac{\text{Rs.500 Cr}}{\text{Rs.2500 Cr}} \times \text{Rs.4000 Cr} = \text{Rs.3200 Cr}$$

subject to ceiling of Rs.2500 Cr

Any Capital Expenditure incurred by the Distribution Licensee in excess of the approved Capital Expenditure for the relevant financial year shall not be allowed in tariff.

Provided also that the Commission shall undertake prudence check of the actual investments made towards the capex, as per Regulation 25 of these Regulations, for each year of the Control Period, to ascertain the achievement of stated benefits or system parameters and the reasonableness of the capital investment in accordance with the guidelines and directions issued by the Commission from time to time;

49.6 The Licensee shall submit, along with the Petition for Annual Performance Review (truing-up), the details showing the progress of capital expenditure projects, together with such other information, particulars or documents as the Commission may require to assess such progress;

50. **Prudence Check of Capital Works:**

50.1 The Commission shall undertake / cause to undertake prudence check of the following types of capital works of the Distribution Licensees;

- (i) Capacity augmentation / strengthening of sub stations, distribution lines / cables, transformers, circuit breakers etc., to mitigate overloading or to provide redundancy or to improve voltage profile or reduce losses;
- (ii) Upgradation of distribution network in a particular area including ring main systems, for improvement in quality of supply and reliability of distribution system;
- (iii) Construction of Receiving substation, distribution lines and installation of distribution transformers to cater to demand in a particular area;
- (iv) Installation or Upgradation of SCADA / DAS, including required communication system;
- (v) Conversion of overhead wires to underground cables;
- (vi) All metering schemes;
- (vii) Battery Storage Schemes;
- (viii) Capital nature Schemes funded partially / fully by Central or State Government grants.

50.2 The Licensee shall submit to the Commission the list of works / projects / schemes commissioned and categorised for the financial year/s for which the Commission decides to undertake prudence check;

50.3 The Works identified for prudence check shall be subjected to detailed scrutiny including the following aspects;

- (e) Whether approval has been obtained from the Commission;

- (f) Whether DPRs were prepared duly indicating the pre and post commissioning benefits in the DPRs/ Estimates;
- (g) Whether the implementation of the project is as per the plan (DPR/ Estimates) or there are no major deviations to the original plan;
- (h) Whether the required objectives as per the DPR have been achieved;

Detailed procedure for conducting the “**Prudence Check**” are enunciated in **Annexure-II** to these Regulations;

- 50.4 The disallowance of depreciation and interest on capital expenditure, to the extent of the works considered imprudent, shall be at the rate of depreciation applicable to appropriate heads of accounts like Plant and Machinery etc., as per CERC Regulations / Notification and interest rate equal to weighted average rates applicable to existing capital loans for relevant years. The disallowance of interest and depreciation on imprudent works shall continue till the work is considered as prudent, by the Commission. The amount so disallowed shall not be reversed / added back in the ensuring ARR gap and same cannot be passed on to the consumers;

Provided also that in case the actual benefits of the Capex are greater than the anticipated benefits, no sharing of gains shall be allowed to the Applicant;

51. **Operation and Maintenance Expenses:**

- 51.1 The Distribution Licensees shall be permitted to recover through tariff, subject to Annual Performance Review (truing-up), the ‘Operation and Maintenance’ expenses in accordance with this Regulation.
- 51.2 The Components of ‘Operation and Maintenance’ expenses include the following;
- (a) Repairs and Maintenance Expenses;
 - (b) Employee Expenses, excluding contribution towards pension and gratuity, Newly Defined Contributory Pension Scheme and Leave Encashment;

Provided that the Contribution towards pension and gratuity, Newly Defined Contributory Pension Scheme and Leave Encashment and arrears of wage revision, if any to be factored in employee cost shall be separately as un-controllable expenditure;

(c) Administrative and General Expenses;

51.3 The base year 'Operation and Maintenance' expenses shall be derived on the basis of the average of the Trued-up 'Operation and Maintenance' expenses (separately for each of the component indicated in Regulation 51.2) after adding / deducting the share of efficiency gains / losses, for the three previous years prior to the Control Period (Eg: For the Control Period FY25 to FY27, average of trued-up O and M expenses of FY21, FY22 and FY23 shall be considered), excluding abnormal 'Operation and Maintenance' expenses, if any, subject to prudence check by the Commission;

Provided that such base year 'Operation and Maintenance' expenses shall be escalated at the escalation rate considering Inflation Rate, Consumer Growth Rate and Efficiency Factor, for each year of the Control Period by adopting the following formula;

Formula: $[(1 + \text{Inflation Rate} + \text{Consumer Growth Rate} - \text{Efficiency Factor}) \times \text{Base 'Operation and Maintenance' expenses}]$

Where;

'**Inflation Rate**' shall be the Wholesale Price Index (WPI) as per the data available from the Ministry of Commerce and Industry, Government of India and Consumer Price Index (CPI) as per the data available from the Labour Bureau, Government of India and adopting the methodology followed by CERC with CPI and WPI in a ratio of 80:20 or such other ratio as may be considered by the Commission, considering the data of past Ten financial years;

'**Consumer Growth Rate**' shall be the CAGR of past three years' consumer growth rate (Eg: For the Control Period FY25 to FY27, CAGR of FY21 to FY23 shall be considered);

'Efficiency Factor' shall be 1% in respect of BESCO and MESCOM and 0.5% for other ESCOMs / distribution licensees;

- 51.4 The impact of Wage Revision, if any, may be considered at the time of Annual Performance Review (true-up) for any Year, based on documentary evidence and justification to be submitted by the Petitioner;
- 51.5 While truing-up the 'Operation and Maintenance' expenses, the Commission shall allow the actual O and M expenses or the normative expenses, whichever is lower.
- 51.6 The Provisions in respect of wage revision expenses shall not be allowed as expenses at the time of Annual Performance Review (true-up), and only expenses actually incurred shall be allowed;
52. **Other Income (Non-Tariff Income):**
- (a) All incomes being incidental to electricity business and derived by the Licensee from sources, including, but not limited to, wheeling charges from open access consumers, cross subsidy surcharge, additional surcharge, profit derived from disposal of assets, income from rent of land and buildings, delayed payment surcharge, meter rent (if any), income from investments other than contingency reserves, interest income on advance to suppliers and contractors, income from rent from staff quarters, income from rent from contractors, income from hire charges from contractors and others, supervision charges for capital works, income from consumer charges levied in accordance with Schedule of Charges approved by the Commission, income from recovery against theft and/or pilferage of electricity, income from advertisements, income from sale of tender documents, miscellaneous receipts from the consumers other Business of the Distribution Licensee shall constitute Non-Tariff Income of the Distribution Licensee.
- (b) The amount received by the Licensee on account of Non-Tariff Income shall be deducted from the Aggregate Revenue Requirement in calculating the net revenue requirement of the Distribution Licensee.

53. Income from Other Business:

Where the Distribution Licensee has engaged in any Other Business under Section 51 of the Act for optimum utilisation of its assets, an amount equal to two-thirds of the revenues from such Other Business after deduction of all direct and indirect costs attributed to such Other Business shall be deducted from the Aggregate Revenue Requirement in calculating the Annual Distribution Charges of the Distribution Licensee;

Provided that the Distribution Licensee shall follow a reasonable basis for allocation of all joint and common costs between the Distribution Business and the Other Business and shall submit the Allocation Statement, duly certified by the Statutory Auditor, to the Commission along with its Petition for determination of Aggregate Revenue Requirement;

Provided further that where the sum total of the direct and indirect costs of such Other Business exceeds the revenues from such Other Business, no amount shall be allowed to be added to the Aggregate Revenue Requirement of the Distribution Licensee on account of such Other Business;

54. Other Debits:

The other debits, for the purpose of Annual Performance Review (truing up) shall be allowed based on the actual expenditure incurred during the year excluding any provisions for bad and doubtful debts and other expenses, subject to due diligence;

55. Net Prior Period debit / credit:

The net prior period debit / credit, for the purpose of Annual Performance Review (truing up), shall be allowed as per the actual expenditure/ income incurred / received by the Distribution Licensee during the year, as per the audited accounts, subject to due diligence.

56. Determination of tariff for Distribution Wires Business:

(a) The Wheeling Charges of the Distribution Licensee shall be determined by the Commission considering the ARR pertaining to distribution wires business;

- (b) The allocation of the ARR pertaining to distribution wires business may be allocated to HT and LT networks for determining the wheeling charges in the ratio of 30:70, as per the following formula;

$$\begin{array}{l} \text{(A) Wheeling Charges} \\ = \\ \text{(Paise/kWh)} \end{array} \quad \begin{array}{l} \text{ARR of Distribution Wires} \\ \text{Business} \\ \text{(Rs.in Crores)} \\ \hline \text{Energy Sales(MU)} \end{array} \times 10^3$$

Wheeling Charges for HT
Network (Paise/kWh) 30% of (A)
(to be rounded off to nearest paise)

Wheeling Charges for LT
Network (Paise/kWh) 70% of (A)
(to be rounded off to nearest paise)

- (c) The Distribution Licensee Wires Business shall be allowed to recover, in kind, the approved target level of Wheeling Losses in accordance with Regulation 6 of these Regulations;

57. **Determination of Retail Supply Tariff:**

- 57.1 The Commission may categorize consumers on the basis of their load factor, power factor, voltage, total consumption of electricity during any specified period or the time at which the supply is required or the geographical position of any area, the nature of supply and the purpose for which the supply is required;
- 57.2 The retail supply tariff for different consumer categories shall be determined on the basis of the Average Cost of Supply, computed by dividing Aggregate Revenue Requirement of the Distribution Licensee for the Year by total approved sales of the Distribution Licensee for the respective Year. The approved ARR shall also include revenue gap / surplus as per APR of the previous year/s.

Provided that, the Commission shall ensure recovery of fixed charge components of the ARR in a reasonable manner in the form of fixed charges /

additional surcharge from the retail supply consumers / open access consumers;

- 57.3 The Commission shall compute the voltage-wise cost of supply and indicate the level of cross- subsidisation in the Tariff Order separately.
- 57.4 The Commission shall endeavour to gradually reduce the cross-subsidy between consumer categories with respect to the Average Cost of Supply in accordance with the provisions of the Act;
- 57.5 While determining the tariff, the Commission may keep in view the cost of supply at different voltage levels and the need to minimise tariff shock to consumers;

PART-IX

SUBSIDY, CROSS SUBSIDY SURCHARGE AND ADDITIONAL SURCHARGE

58. **Subsidy:**

- (a) The Commission shall determine that Aggregate Revenue Requirement and Tariff without considering subsidy;

Provided that in case the State Government declares subsidy in advance or during tariff filing proceedings and the licensee incorporates the subsidy in the petition, the Commission shall notify two tariff schedules, one with subsidy and the other without subsidy;

- (b) In case of no disbursement or delayed disbursement of subsidy by the Government, the licensee shall charge consumers as per the tariff schedule which is approved by the Commission, without consideration of subsidy;
- (c) The distribution licensee shall submit to the Commission on quarterly basis the information on subsidy due, subsidy overdue and subsidy realized based on actual energy supplied to subsidized categories of consumer, in the format as prescribed by the Commission from time to time. The report on subsidy status shall be hosted on the distribution licensee's website;

59. **Cross Subsidy Surcharge and Additional Surcharge:**

59.1 The consumers who are permitted open access through the transmission network of the Transmission Licensee and the Distribution network of a Distribution Licensee shall pay to the Distribution Licensee in whose area the consumer is located, a cross subsidy surcharge as per the formula prescribed in the Government of India's Tariff Policy as follows;

Formula:

$$S=T-C/(1-L/100)+D+R$$

Where

S is the Cross Subsidy Surcharge, subject to maximum of twenty percent of the average cost of supply;

T is the tariff payable by the relevant category of consumers, including reflecting the Renewable Purchase Obligation;

C is the per unit weighted average cost of power purchase by the Licensee, including meeting the Renewable Purchase Obligation;

D is the aggregate of transmission, distribution and wheeling charge applicable to the relevant voltage level;

L is the aggregate of transmission, distribution and commercial losses, expressed as a percentage applicable to the relevant voltage level;

R is the per unit cost of carrying regulatory asset;

59.2 obligation to supply power under section 42(4) of the EA 2003, the Distribution Licensee is liable to receive additional surcharge. However, the surcharge is payable by the open access consumer only if it is conclusively demonstrated that the obligations of a Licensee, in terms of the existing power purchase commitments, has been and continues to be stranded, or there is an unavoidable obligation and incidence to bear fixed costs consequent to such a contract;

- 59.3 The amount received or to be received by the licensee on account of cross-subsidy surcharge and additional surcharge, as approved by the Commission from time to time, shall be shown separately against the consumer category that is permitted open access;
- 59.4 Cross-subsidy surcharge and additional surcharge shall be shown as revenue from the tariff from the consumer categories who have been permitted open access and such amount shall be utilized to meet the cross-subsidy requirements of subsidized categories and fixed costs of the Distribution Licensee arising out of his obligation to supply;
- Provided that the licensee shall provide such details in its tariff filings for the Control Period;
- 59.5 The Commission shall compute the Cross Subsidy Surcharge and Additional Surcharge, for levying to the open access consumers, in the Tariff Orders.

PART-X MISCELLANEOUS

60. **Power to amend:**
The Commission may, at any time, amend any provisions of these Regulations;
61. **Power to remove difficulties:**
If any difficulty arises in giving effect to the provisions of these Regulations, the Commission may, by general or specific order, make such provisions not inconsistent with the provisions of the Act, as may appear to be necessary for removing the difficulty;
62. **Repeal and savings:**
(a) Save as otherwise provided in these Regulations, the following Regulations are hereby repealed;
- i. The Karnataka Electricity Regulatory Commission (Tariff) Regulations, 2000 and amendments thereof;
 - ii. The Karnataka Electricity Regulatory Commission (Terms and Conditions for Determination of Tariff for Distribution and Retail Sale of Electricity) Regulations, 2006 and its amendments thereof;

- iii. The Karnataka Electricity Regulatory Commission (Terms and Conditions for Determination of Tariff for Transmission of Electricity) Regulations, 2006 and its amendments thereof;
- (b) Notwithstanding such repeal, any proceedings before the Commission pertaining to the period prior to the commencement of these Regulations, including Petitions for Annual Performance Review (True up) of expenses, annual performance review, etc. shall be governed by the Regulations mentioned in Regulation 63 (a) above;
- 63. Saving of inherent power of the Commission:**
- 63.1 Nothing in these Regulations shall be deemed to limit or otherwise affect the inherent power of the Commission to make such orders as may be necessary for ends of justice or to prevent abuse of the process of the Commission;
- 63.2 Nothing in these Regulations shall bar the commission from adopting in conformity with the provisions of the Act a procedure, which is at variance with any of the provisions of these Regulations, if the Commission, in view of the special circumstances of a matter or class of matters and for reasons to be recorded in writing, deems it necessary or expedient for dealing with such a matter or class of matters;
- 63.3 Nothing in these Regulations shall, expressly or impliedly, bar the Commission dealing with any matter or exercising any power under the Act for which no Regulations have been framed, and the Commission may deal with such matters, powers and functions in a manner it thinks fit;

By the approval of the Commission

**Secretary,
Karnataka Electricity Regulatory Commission.**

Annexure-I

METHODOLOGY FOR COMPUTATION OF AT&C LOSS

A	Input Energy (MU)	Energy Generated - Auxiliary Consumption + Energy Purchased (Gross) - Energy Traded / Inter-State Sales.
B	Transmission Losses (MU)	
C	Net Energy Input (MU)	A-B Open Access / wheeling units shall not be included in Net Input Energy.
D	Energy Sold (MU)	Energy Sold to all categories of consumers excluding units of Energy Traded / Inter-State Sales. Open Access / wheeling units shall not be included in Energy Sold.
E	Revenue from Sale of Energy (Rs.in Crores)	Revenue from Sale of Energy to all categories of consumers (including subsidy booked) but excluding Revenue from Energy Traded / Inter-State Sales. Unbilled Revenue shall not be considered.
F	Adjusted Revenue from Sale of Energy on Subsidy Received basis (Rs.in Crores)	Revenue from Sale of Energy (same as E above) minus Subsidy Booked plus total Tariff Subsidy received during the year including arrears (if any).
G	Opening Debtors for Sale of Energy (Rs.in Crores)	Opening debtors for Sale of Energy as shown in Receivable Schedule (Without deducting provisions for doubtful debts). Unbilled Revenue shall not be considered as Debtors.
H	Closing Debtors for Sale of Energy (Rs.in Crores)	i) Closing debtors for Sale of Energy as shown in Receivable Schedule (Without deducting provisions for doubtful debts). Unbilled Revenue shall not be considered as Debtors. ii) Any amount written off during the year directly from (i)
I	Adjusted Closing Debtors for Sale of Energy (Rs.in Crores)	H (i+ii)
J	Collection Efficiency (%)	(F+G-I)/E x 100
K	Units Realized (MU) = [Energy Sold x Collection Efficiency]	D X J/100

L	Units un-realized (MU) = [Net Input Energy - Units Realized]	C-K
M	AT&C Loss (%) = [(Units un-realized / Net Input Energy)x100]	L/C x 100

Annexure-II

Procedure for Conducting Prudence Check of Capital Expenditure of Transmission and Distribution Licensees.

The Commission, in its Tariff Orders has been allowing the Capital expenditure incurred by the Utilities for the respective financial years, subject to carrying out prudence checks to ascertain as to whether capital investments are made in a prudent manner or otherwise and also to disallow interest and depreciation on the imprudent works, if any in order to avoid the burden on consumers with costs of redundant investments. In view of this, Commission proposes following procedure to take up Prudence Check of Capex incurred on commissioned and categorized works for the respective financial years which are as under:

1. For the purpose of the prudence check of transmission Licensee and distribution licensees, the investments that will be viewed in respect of works as per para 35 and 50 of these regulations:
 - a) The commissioned and capitalized works, which are categorized during the respective financial years are considered for Prudence check.
 - b) Major Material Procurement carried out during the Financial years.
2. The works categorized shall be selected on the basis of the following principles:

a) For Transmission Licensee as indicated in para 35 :

- i. Works costing more than Rs.5 Crores in case of:
 - Establishment of Substations;
 - Construction of transmission lines;
 - Construction of exclusive transmission lines;
 - Augmentation of transmission lines;
 - Augmentation of substations and
 - Other type of works, like construction of terminal bays, construction of intermediate tower, Circuit breakers etc.

- ii. All the major materials being procured by Transmission Licensee typically are as follows:
- Power Transformers.
 - Circuit breakers.
 - Conductors and cables.
 - Transmission line tower parts and
 - Other major materials.

b) For Distribution Licensees as indicated in para 50:

i. All the categories of Works costing more than Rs.5 Lakhs in case of:

- Capacity augmentation/ strengthening of sub stations, distribution lines/cables, transformers, circuit breakers etc., to mitigate overloading or to providing redundancy or to improve voltage regulations;
- Upgradation of distribution network in a particular area including ring main systems, for improvement in quality of supply and reliability of distribution system;
- Construction of sub-stations, distribution transformers to cater to demand in a particular area;
- Installation or upgradation of SCADA /DAS, including required communication system;
- Conversion of overhead wires to underground cables;
- All metering schemes;
- Battery storage schemes;
- Capital nature schemes funded partially/fully by central or state government grants.
- Other type of works

ii. The major materials being procured are typically as follows:

- Distribution line supports like all types of poles.
- Conductors.
- Insulators.
- Distribution Transformers.
- Underground (UG) cables.
- Ring Main Units (RMU)
- Energy meters and
- Other materials

The works from the above, should be reviewed by carrying out physical verification at site and document as per these guidelines.

Note: During the independent scrutiny by the Commission, through the consultants, the Commission may notify separately the total no. of samples and samples to be selected from above works/any other capital works as decided by the Commission.

3. While reviewing the capital expenditure, the focus should be on the different aspects of capital expenditure, as shown below instead of only on the end results:

a) Planning:

- i. Whether the works were planned in the capex of the respective year and included in the overall capex approved by the Commission;
- ii. Whether DPRs were prepared and detailed sub-estimates were prepared before taking up the work, duly indicating the pre and post commissioning results in the DPRs/ Estimates.

b) Whether the implementation of the project is as per the plan (DPR/ Estimates) or there are no major deviations to the original plan;

c) Whether the major objectives as per the DPR have been achieved.

- i. Each of the three aspects will carry weights and each of investments under review will be scored and measured on each of the three aspects based on the procedure in this document.
- ii. A capital work will be scored with a weight of 10 marks each for planning and 30 marks for implementation and 60 marks for achievement of objectives. Of the 60 marks for achievement of objectives 50 will be awarded for primary objective and the rest 10 marks for secondary objectives.
- iii. For the investment to be considered prudent and project to be considered as meeting the standards of Prudence, it should score 30 Marks out of 50 Marks on evaluation of achievement of primary objectives and 30 Marks out of the balance 50 Marks for Planning, Implementation and Secondary Objectives, totalling to at least 60 Marks out of 100 Marks. The methodology of scoring is detailed in the **Annexure II (a)** based on Grading.

4. Each project will be reviewed for the various checks as outlined below for all the three phases of capital expenditure Viz. Planning, Implementation and Post execution:

a. Planning

- i. Licensees should have prepared required DPR/Estimates justifying the need for the proposed investment. The justification indicated in the DPR/Estimates shall be on the basis of field requirements, studies undertaken or directives issued by the Commission or Government initiatives, etc. Wherever necessary supporting documents should be available for review.
- ii. If a project with a Cost to benefit ratio less than 1 (One) is selected for implementation, the Licensee should have records available which justify taking up such projects. Similarly, if the pay-back period is more than 10 (Ten) years the records should justify the reasons for taking up such a project.
- iii. The Licensee should have identified Primary and Secondary objectives for each investment. In case objectives are not defined at the time of investment, certain default objectives will be assigned as outlined in **Annexure II (b)** depending on the nature of investment and the performance will be evaluated against those set objectives.
- iv. The Licensee should have considered various alternatives at the time of conceptualizing the investment in the DPR/Estimates. DPR must contain Technical reports, Design criteria, Bill of quantity, Item wise Estimate Cost, Documents necessary to support the details contained in DPR.
- v. If the project is linked with other upstream or downstream projects, appropriate co-ordination is to be ensured for the implementation of the project in economical, efficient and effective manner.

b. Implementation

- i. The contractor should have been selected using a Competitive Bid process. The documents pertaining to the same should be produced by the utilities.
- ii. Licensee shall ensure that there are no delays in the project completion or overruns in costs. In case of time overrun or cost overrun, the Licensee should provide specific reasons for the same. The Licensee also has to specify whether the delay/increase in cost can be attributed to Licensee or contractor or external factors.
- iii. In case the delay is attributable to contractor, the Licensee should provide details pertaining to imposition of liquidated damages. In case liquidated damages are not levied the Licensee shall provide specific reasons to the satisfaction of the Commission, for waiving off the same.

- iv. Licensee shall specify if there were changes in the design or scope of the project executed when compared to DPR/Estimate. Reasons for deviation should be documented.
- v. The Licensee shall ensure quality execution of works as per [Central Electricity Authority \(Technical Standards for Construction of Electrical Plants and Electric Lines\) Regulations, 2022](#) and amendments issued from time to time.
- vi. For partial-turnkey projects or projects in which material was to be supplied by the Licensee, care should have been taken to ensure that the required resources are procured in time and made available for timely execution.
- vii. The execution of the project should have been monitored from time to time and any issues that crop up in causing time/cost overruns should have been reported/ addressed at an early stage. Status reports for longer construction time project should be prepared regularly and completion report has to be prepared containing Date of commissioning and cost of completion.

c. Post Execution

- i. The Licensee should have periodically recorded the benefits achieved from the project. The year on year details related to savings if any, achieved should be compared with the estimated benefits in terms of:
 - Whether the primary and secondary objectives as listed out are met
 - Cost benefit analysis - estimated vs actual recorded
 - Payback period is in line with the estimated
- ii. The onus of providing the proof of achieving the primary and secondary objectives shall be on the Licensee. The Commission may independently verify the authenticity of numbers provided, wherever the benefits are quantitative in nature.
- iii. For all those projects where the estimated benefits have not been quantified in the planning stages, the Licensee shall provide details with regard to performance of the system prior to commissioning of the project and performance of the system post commissioning.

For example: in case number of reductions in interruptions are not recorded, the Licensee shall provide from records the interruptions prior to execution of project and interruptions after implementation of project.

- d. **Information** in the enclosed Formats/Annexures a & b shall be collected in respect of all the works as specified in the above para-2 of this documents. Supplementary /additional information should be obtained wherever necessary to reach a conclusion on the prudence of the investment.

Annexure II (a)

PROJECT DATA:

Name of the Licensee:

Zone :.....

Circle:.....

Division:.....

Location:.....

Name/Description of the Capital Work:.....

Date of Sanction:.....

Estimated Cost:

Awarded Cost:

Date of Work Award:.....

Date of Commencement:.....

Targeted Date of Completion:.....

Actual Date of Completion:.....

BRIEF DESCRIPTION OF THE WORK

- i. Briefly record the reasons (circumstances necessitating) for taking up the Work.
.....
.....
- ii. What was the Primary/Major objective or the purpose intended to be achieved/Results to flow from the work? Please quantify the results intended(Ex: Meeting the load of ----- MVA/kVA)
.....
.....
- iii. Whether the primary objective/ Results of the work was intended to be achieved in full on completion of the work or was it meant for a phased realisation?
 - a. To be achieved in full on commissioning
 - b. To be achieved in phases of
 - c. 1st Year:.....%, 2nd Year:.....%, 3rd Year:% and so on.,
.....
.....

- iv. List other intended objectives if any to be achieved and the time planned for such achievement:

Name of the Objectives	Targeted time of achievement
1.
2.
3.
4.
5.

- v. Planning of Expenditure:

Year 1:Rs.
 Year 2:Rs.
 Year 3:Rs.
 Year 4:Rs.

- vi. Details of financing plan for the project undertaken, if any. Else provide the sources from which the funds were diverted

.....

- vii. Provide the list of alternatives considered. If the alternatives are provided, mention the basis on which the proposed scheme is finalised.

.....

- viii. Details of Cost Benefit Analysis and Payback Period calculations. Wherever projects were taken up with CBA <1 or Payback Period higher than 10 years, provide reasons for taking up the same

.....

.....

PERFORMANCE EVALUATION

Project Performance / Results in terms of the Objectives

- i. Cost data analysis:

Sanctioned /Awarded Cost of Estimate: Rs.
 Actual Expenditure: Rs.
 (Till date of commissioning)

Comparison of actual expenditure Vs Sanctioned /Awarded cost:

Rs. Excess/Less

Variation in % of the cost of sanctioned estimate /awarded cost:

(+/-)....%

ii. **Schedule of Implementation:**

Targeted date of completion as per Detailed work order

Actual date of completion:.....

Time overrun in Years.....Months

Reasons for delay, if any, as ascertained (describe reasons attributable for project delay/ justification for delay/delays attributable to Contractor or Licensee):.....
.....iii. **Primary objective** (Quantitative Description. Ex: Demand in MVA met., etc)

Actual Achievement after completion:

	Quantity	% Achievement
1 st Year
2 nd Year
3 rd Year
4 th Year

iv. **Other Objectives realised till date:**

Name of the Objective	Quantity	% Achievement
1.
2.
3.
4.

Observations on outstanding features/Major problems in the design/ implementation of the project:

.....
.....**Note: The evaluation of primary and secondary objectives shall be carried out as per the enclosed format on post commissioning analysis.**v. **Capitalisation / Asset categorisation:**

Status of Accounting and Capitalisation				
Date of asset categorisation	Amount of asset categorisation in Rs. Lakhs	Amount of depreciation charged in Rs. Lakhs	Amount of interest capitalised in Rs. Lakhs	Remarks

Observations on asset categorisation and capitalisation:

.....

GRADING

A. Planning:	10 marks
	Marks
i. Investment – Proactive or Reactive	3
ii. DPR and cost benefit analysis	2
iii. Alternatives	5
B. Implementation:	
i. Schedule of Implementation:	
	Marks
a) Commissioned within the Estimated time-	10
b) Commissioned beyond the estimated time:	
i. Within one year	8
ii. Between one year and two years	4
iii. Above two years	0
ii. Cost of Implementation:	
	Marks
a. Commissioned within the Estimated Cost-	10
b. Excess of expenditure over sanctioned estimate:	
Within 10%	8
10% to 25%	4
Above 25%	0
iii. Quality of execution:	10 marks

Observation on the overall quality of executing the work (Ex. Alignment of primary /secondary lines, erection of poles, stringing of conductors in terms of sag, providing guards at the road crossing, grounding of poles carrying 11kV lines etc.)- PI provide detailed observations.

.....

C. Ex-Post Analysis:**i) Primary Objectives realised/Results Achieved:****50 marks**

Primary objective realised on commissioning:

	Planned	Achieved	%
1 st Year
2 nd Year
3 rd Year
4 th Year

Scenario 1: In all those cases where primary objective is clearly specified and quantified:
- 50 marks, if primary objective is achieved in full on completion or as per planned in phases.

Scenario 2: In cases where the exact saving has not been quantified prior to execution:
- 50 marks, if the actual savings achieved show at least 50% improvement over the performance prior to execution.

Proportionately fewer marks will be awarded in case of shortfall in achievement on two counts

- if achievement is delayed against planned phasing, then 5 marks to be deducted for each year's delay. Ex: If 100% was planned in 1st year and actual achievement took place in 3rd year, then 10 marks to be deducted from 50 marks
- if performance achieved in cases of Scenario 2 has shown less than 50% improvement, then 5 marks to be deducted for every 5% less. Ex: If interruptions prior to commissioning were 100 and post commissioning of the project have reduced to 60, 10 marks will be deducted from 50.

iv. Other Objectives (Secondary objectives):**10 Marks**

	Name of the Objective	Planned Achievement	Actual Achievement	Marks
1.
2.
3.
4.

The total of 10 marks for other objectives to be divided among the listed other objectives in proportion to their relative importance by the Officer doing the evaluation. Marks scored in respect of each objective shall be in proportion to the percentage achievement till the date of evaluation. Wherever relevant, the grading rules specified for Primary objective may be applied in case of Secondary objectives as well.

v. **Summary of Marks:**

Parameter	Maximum Marks	Marks Scored
Planning		
Investment – Proactive or Reactive	3	
DPR and cost benefit analysis	2	
Alternatives	5	
Implementation		
Schedule of implementation	10	
Cost of Implementation	10	
Quality of execution	10	
Ex-post Analysis		
Achievement of Primary Objective	50	
Achievement of Secondary Objectives	10	
Total	100	

Note: -

- i. A project to be considered as meeting the standards of Prudence, if it should score 30 Marks out of 50 Marks on evaluation of achievement of primary objective and 30 Marks out of the balance 50 Marks for Planning, Implementation and Secondary Objectives, totalling to at least 60 Marks out of 100 Marks.
- ii. In case a project has scored 40 marks to 60 Marks, then the Licensee is provided an opportunity to take corrective measures and demonstrate the improved results to indicate the prudence of investment.
- iii. In case a project has scored below 40 Marks, the same is intimated to the Licensee before deciding it as not meeting prudence requirements.

vi. **Concluding remarks about the work:**

.....

Annexure II (b)

Nature of work	Primary Objective	Secondary Objectives
Substation (New substation, Additional transformer)	Load growth	Loss reduction, Quality of Supply (HTVR)
New feeder/feeder bifurcation	Load relief/ New load	Loss reduction, Quality of Supply (HTVR)
Reconductoring	Reduction in interruptions	Reduction in losses, Quality of supply (HTVR)
Improvement works (Intermediate poles, Auto enclosures)	Reduction in interruptions	
DTC Metering	Energy Audit, Reduction of commercial losses	
Additional DTCs	Loss reduction	Quality of supply
DSM works	Load curve flattening	Reduction in losses/
Providing infrastructure to unauthorized IP sets	Reduction in losses	Quality of Supply (HTVR), Reduction in transformer failures
Renovation works (Replacement of deteriorated equipment)	Quality of supply	Reduction in loss levels
RGGVY, NJY, DDUGJY, any other schemes and electrification projects with social objectives	As defined in the project report	
Other projects	As defined in the report or specified by Transmission and Distribution Licensees	

ANNEXURE-III**Procedure for calculation of Transmission System Availability**

- i) Availability shall be calculated and declared separately for each voltage level.

The transmission system availability shall be declared as per the formula mentioned below. The transmission elements shall be grouped into following categories for the purpose of calculation of availability of transmission systems:

(a) AC transmission lines: Each circuit of AC transmission line shall be considered as one element.

(b) Inter-Connecting Transformers (ICTs): Each ICT bank (three single phase transformer together) shall form one element.

(c) Static VAR Compensator (SVC): SVC along with SVC transformer shall form one element. However, 50% credit to inductive and 50% to capacitive rating shall be given.

(d) Switched Bus Reactor: Each switched Bus Reactor shall be considered as one element.

ii) The Availability of Transmission system shall be calculated as under:

% System Availability for the system

$$= \frac{o \times AV_o + p \times AV_p + q \times AV_q + r \times AV_r}{o + p + q + r} \times 100$$

Where

o is Total number of AC lines.

AV_o is Availability of o number of AC lines.

p is Total number of switched bus reactors.

AV_p is Availability of p number of switched bus reactors.

q is Total number of ICTs.

AV_q is Availability of q number of ICTs.

r is Total number of SVCs.

AV_r is Availability of r number of SVCs.

iii) The weightage factor for each category of transmission elements shall be as under:

(a) For each circuit of AC line – Surge Impedance Loading for Uncompensated line (SIL) multiplied by Circuit Km. (SIL rating for various voltage level and conductor configuration shall be as per the procedure adopted for power system analysis)

(b) For each ICT bank – The rated MVA capacity.

(c) For SVC – The rated MVAR capacity (inductive & capacitive).

(d) For switched Bus reactor – The rated MVAR capacity.

iv) The availability for each category of transmission elements shall be calculated based on the weightage factor, total hours under consideration and non-available hours for each element of that category. The formulae for calculation of Availability of each category of the Transmission elements are as per Enclosure-I.

- v) The transmission elements under outage due to following reasons not attributable to the Transmission Licensee shall be deemed to be available:
- (a) Shut down to transmission elements availed by other agency/agencies for maintenance or construction of their transmission system.
- (b) Manual tripping of line due to over voltage and manual tripping of switched bus reactor as per the directions of RLDC / SLDC.
- vi) Outage time of transmission elements for the following contingencies shall be excluded from the total time of the element under period of consideration.
- (a) Outage of elements due to acts of God and force majeure events beyond the control of the Transmission Licensee.
- (b) Outage caused by grid incident/disturbance not attributable to the Transmission Licensee, e.g. faults in substation or bays owned by other agency causing outage of the Transmission Licensee's elements, tripping of lines, ICTs, etc. due to grid disturbance. However, if the elements is not restored on receipt of direction from SLDC while normalising the system following grid incident/disturbance within reasonable time, the element will be considered not available for whole period of outage and outage time shall be attributable to the Transmission Licensee.

Enclosure-1

AVo (Availability of o no. of AC lines) =

$$\frac{\sum_{i=1}^o (W_i(T_i - TNA_i) / T_i)}{\sum_{i=1}^o W_i}$$

AVq (Availability of q no. of ICTs)=

$$\frac{\sum_{K=1}^q (W_k(T_k - TNA_k) / T_k)}{\sum_{k=1}^q W_k}$$
